SCART to Component Video & Stereo Audio Cable

Connect a Set Top Box to a Television or Receiver

Many set top boxes including the most widely distributed pay TV boxes have the ability to output a component quality picture via a Scart Connection.

The PureAV SCART to Component Video cable is the ideal solution for transmitting a high quality Component Video and Stereo Audio signal from a SCART output*.

Component Video separates colour into its primary components using three cables to transmit three distinct signals. This provides brighter, more accurate colours and sharper detail, exceeding the performance of Composite and S-Video.

Part Number	Description	RRP
AV21503-06	SCART to Component Video & Stereo Audio Cable 1.8m	$129.95
AV215503-12	SCART to Component Video & Stereo Audiio Cable 3.6m	$149.95

*Note only compatible with devices capable of transmitting component video output
